

INDONESIAN CLOUD – PT. DIGITAL SOLUTIONS INDONESIA VPN ACCESS

To access the VPN, follow these steps below:

1. Goto URL : <https://43.231.129.7:8080/>
Username : admin
Password : IDCloud2015 (should be changed).

2. Open menu **VPN -> Open VPN**

3. Click TAB “Client Export”

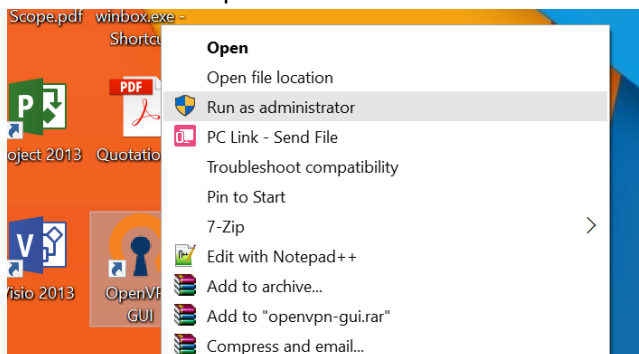

4. Scroll down, and find section “Client Install Packages”.

EXAMPLE: remote-random;

Client Install Packages		
User	Certificate Name	Export
vpnuser	vpnuser	<ul style="list-style-type: none">- Standard Configurations:<ul style="list-style-type: none">Archive Config Only- Inline Configurations:<ul style="list-style-type: none">Android OpenVPN Connect (iOS/Android) Others- Windows Installers (2.3.8-1x01):<ul style="list-style-type: none">x86-xp x64-xp x86-win6 x64-win6- Mac OS X:<ul style="list-style-type: none">Viscosity Bundle

Download the client, based on OS, example Windows Vista or Later download X64-win6

5. After downloaded, install the client to your PC. Just follow the instructions until finish.
6. After Installed, start the client GUI by right clicking the Icon, and “Run as Administrator” from the Icon in Desktop.

7. After started, a tray icon appears in the bottom right

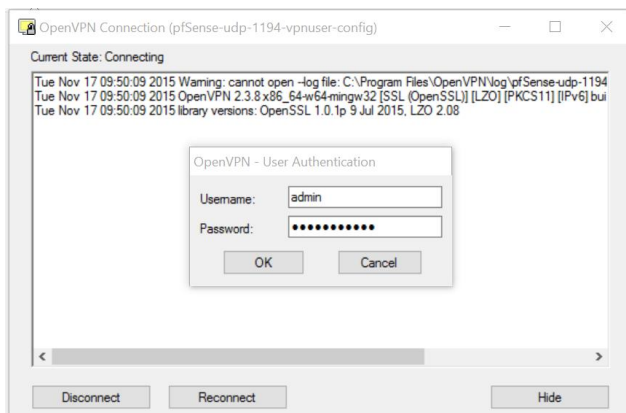

8. Right click the Icon, and click “Connect”

9. Login box will show up, and use this credential below to login to VPN:

User Name	vpnuser
Password	IDCloud2015

10. If connected a notification appears.

11. Now we can access all the VMs using SSH or RDP.
